NICELITE LED BULBS FOR
MINI-MAGLITE® & SOLITAIRE
fitting instructions

NICELITE LED CONVERSION FOR SOLITAIRE & MINI-MAGLITES®

► CAUTION! TAKE CARE WHEN FITTING ◀

1. Remove the packaging by carefully sliding the polystyrene padding away from the metal bulb disc, to the left and right, as initially seen in the blister.
2. Remove batteries, unscrew and remove the head of the Solitaire or Mini-Maglite®. Grip the existing bulb and pull out.
3. Fit the Nicelite bulb, replace the batteries and end cap to test if it lights. IF NO LIGHT, re-fit the Nicelite bulb at 180 degrees.
4. Remove batteries, and ensure the Nicelite bulb disc is pushed down evenly. Replace the flashlight head slowly while looking at the hole in the reflector to ensure the LED is central and clears the rim of the hole.
